

JUVAMIX

Advanced Beauty Laboratory

PROFESSIONAL AESTHETIC PRODUCT CATALOG

A curated presentation of selected JUVAMIX aesthetic products, combining product imagery, technical specifications and professional application profiles.

JUVAMIX

Advanced Beauty Laboratory

JUVAMIX presents a professional aesthetic portfolio focused on injectable solutions for body contouring, facial refinement and skin-quality enhancement. The catalog brings together selected products in a clear format designed for professional presentation, product reference and client communication.

Portfolio at a Glance

Product	Primary Focus	Presentation
Aveline Body Sculpting	Body contouring & sculpting	100 cc • 2 × 50 cc
Dermofill	Facial contouring & lip enhancement	10.0 ml
Dermofill Hydra Booster	Hydration, radiance & skin quality	2 × 2.0 ml

All treatments described in this catalog are intended for professional use. Treatment selection, dosage, injection technique and suitability should be determined by an appropriately qualified practitioner and according to the manufacturer's instructions.

AVELINE BODY SCULPTING

Advanced Hyaluronic Acid Body Contouring

Product Overview

A high-volume hyaluronic acid injectable positioned for professional body contouring and sculpting procedures. It is intended to support targeted volume enhancement and improve the visual definition and proportions of selected body areas.

Technical Specifications

Active Ingredient	Hyaluronic Acid
Concentration	25 mg/cc
Total Volume	100 cc
Packaging	2 × 50 cc
Application	Body Sculpting & Contouring
Category	Body Filler
Origin	France

Key Benefits & Applications

- Supports targeted body contour enhancement.
- Provides a high-volume 100 cc presentation.
- Designed for professional body-focused aesthetic procedures.
- Supports localized volume enhancement and refined proportions.

Professional Use: Product information is presented for professional reference. Individual results may vary according to treatment area, technique, product characteristics and patient-specific factors.

DERMOFILL 10 CC

Cross-Linked Hyaluronic Acid • Professional Aesthetic Filler

Product Overview

A cross-linked hyaluronic acid injectable designed for professional aesthetic applications, with a focus on facial contouring and lip-focused treatments where controlled volume enhancement and definition are desired.

Technical Specifications

Product Type	Cross-Linked Hyaluronic Acid Filler
Volume	10.0 ml
Concentration	25 mg/ml
Application	Facial Contouring & Lip Enhancement
Use	Professional Aesthetic Treatment
Origin	France

Key Benefits & Applications

- Cross-linked hyaluronic acid formulation.
- Designed for targeted facial volume enhancement.
- Supports facial contour refinement.
- Suitable for lip-focused aesthetic applications according to professional assessment.

Professional Use: Product information is presented for professional reference. Individual results may vary according to treatment area, technique, product characteristics and patient-specific factors.

DERMOFILL HYDRA BOOSTER

Advanced Non-Cross-Linked Hyaluronic Acid Skin Booster

Product Overview

A professional injectable skin booster formulated with non-cross-linked hyaluronic acid. Its primary concept is to support skin hydration, radiance and overall skin quality rather than conventional facial volumization.

Technical Specifications

Product Type	Non-Cross-Linked Hyaluronic Acid Skin Booster
Packaging	2 × 2.0 ml
Primary Focus	Hydration, Radiance & Skin Quality
Injection Protocol	Five-Point Technique
Application	Professional Injectable Aesthetic Treatment
Origin	France

Key Benefits & Applications

- Supports improved skin hydration.
- Helps enhance visible radiance and glow.
- Supports smoother, refreshed-looking skin.
- Designed for professional skin-quality and rejuvenation protocols.

Professional Use: Product information is presented for professional reference. Individual results may vary according to treatment area, technique, product characteristics and patient-specific factors.
